Overview

The *Release Notes* describe the enhancements and modifications included in ACR/Summary®, ACR/Detail®, and ACR/Instream for Release 10.1. This document lists migration concerns and maintenance fixes that may affect your rules if you upgrade from a previous release and known issues.

What's new

This section summarizes the enhancements for ACR Release 10.1.

Infogix Assure is now Assure DQ

As part of the Precisely rebranding strategy, Infogix Assure product is now rebranded Assure DQ. Within the user interface, users will see the new Assure DQ naming being used.

Note that there may still be some underlying references to "Infogix Assure", but those have been kept to reduce any issues with the broader backend name dependencies.

Compiler upgrades

In this release, the compiler used by ACR products on Windows and Unix/Linux platforms has been updated to use Visual COBOL 6, the newer release from Micro Focus.

The compiler used for ACR products on z/OS has been updated to use Cobol version 6.2.

Fixed in this release

The following issues have been fixed in this release of Insight:

JIRA	Details
ACR-12631	UNIPSIO file has low values in bytes 9 and 10
ACR-12632	Missing modules IIA00360,361,370,371 that's being called from IIA00000, putting 0 program back to not call new modules, reissued patch to change 9.6 release to 10.0.0 for both iia00000 and iia00033
ACR-12637	Cycle date Not being reported in "User Report"

The following issues have been fixed in this release of Instream:

JIRA	Details
ACR-12614	Logging the input messages in IIAFLOGA and IIAFLOGB files. Switching between the files when they reach 85%. Also log the error messages in IIAELOGA and IIAELOGB files.
ACR-12614	Include only the integrity check messages, log the message with the rsn code 3013 in the error log file and log the actual date from the input file in the log files.
ACR-12614	Log the messages with rc 3007 in the IIAELOG files

System requirements

This section summarizes the system requirements for this release.

Requirements for z/OS®

Category	Requirement
Operating system	IBM z/OS® 3.1 or higher
TSO Region Size	*6144 (7168 suggested), plus space required by LE runtime libraries.
COBOL	Enterprise COBOL 6.3 or any compatible COBOL is required if you wish to compile user exits.
JAVA®	Version 6.0.1 SR1 or higher

*Additional region size is necessary to install Visibility API, retrieve history from Assure DQ or to process large files in the extract window, particularly for delimited data in ACR/Summary access modes 1-4. To avoid additional tuning, set the region size to 0M.

Requirements for Windows®

ACR/Summary, ACR/Detail Server, ACR/Workbench and Clients

Category	Requirement
Hardware and operating system	Microsoft® Windows 10, or Windows Server 2019

Requirements for UNIX® and Linux®

Vendor	Operating system
IBM	AIX 7.2 or higher (64bit)
Red Hat	Linux® 7.9 or higher (64bit)

Requirements for IBM i

Category	Requirement
Operating System	IBM® i V7R5 or higher
